

Canada Govt DELETES Thousands Of Reported Adverse Events Of Special Interest Pertaining To Hearts, CNS & Autoimmune Disorders

Watch the video report:

On 6/24/22 the Canadian government did the unthinkable: they deleted nearly 2,000 “adverse events of special interest,” comprising 28.3% of their total collected of such reports to date.

Here are 7 weeks of adverse events of special interest data around the mass deleting incident in one spreadsheet:

6/17/22

6/24/22

You can see the 6/24/2022 resulted in the deletion of the following 1,973 reports:

- 110 cases of Guillain-Barré Syndrome BCD* level 42
- 93 cases of Thrombocytopenia (low blood platelets) BCD* level 42
- 1,025 cases of Myocarditis²/Pericarditis (inflammation of the heart muscle and lining around the heart) BCD* level 4
- 11 cases of Thrombosis with thrombocytopenia syndrome (blood clot with low platelets) BCD* level 42
- 734 cases of Bell's Palsy²/facial paralysis BCD* level 4

Keep in mind these 1,973 deleted reports of "adverse events of special interest" accounted for 28.3% of all the total adverse events of special interest.

I can only imagine this is because the Canadian government is desperately trying to conceal how much damage their Nuremberg Code violations have caused, lest the people demand 'eye for an eye' justice.
