

Vaccinated Placentas

Dr. James Thorp presents disturbing images of placentas in vaccinated mothers

Etana Hecht

8 hr ago

I'm sorry if the title of this post is jarring. Unfortunately, we're in a moment where we need to be blunt in order to wake people up and confront our situation.

Dr. Naomi Wolf made an appearance on Warroom last night with Mr. Steve Bannon in order to present some new horrifying information. It's getting more and more difficult to share this information, but the only way out of this darkness is to go through it and understand what we're facing.

Dr. Naomi Wolf Explains Finding from Study on Placentas from Covid Vaccine

While the legacy media had no problem jumping down Dr. Wolf's throat the minute there was a quickly corrected mathematical error regarding one of the team's reports, the media conveniently ignore the rest of the information that the Daily Clout/Warroom team discovers and publicizes. The legacy media really can't have it both ways, and as

alternate media grows stronger by the day, we are going to push this information out to the public no matter what.

Vaccinated Placentas

There have been many news stories and data sets, including those featured heavily in the Pfizer documents themselves, that point to major issues surrounding fertility including pregnancy issues, menstrual irregularities, miscarriages, and newborn and fetus harm in what feels like an attack on the full human reproductive system.

Dr. James Thorp is a Board-Certified Obstetrician Gynecologist and Maternal Fetal Medicine Physician with over 43 years of obstetrical experience. While serving as a very busy clinician his entire career he has also been very active in clinical research with almost 200 publications. Dr. Thorp currently sees about 8,000 high risk pregnancies per year. He has served as a reviewer for major medical journals and served on the Board of Directors for the Society of Maternal Fetal Medicine for four years. He served in the United States Air Force as an Obstetrician Gynecologist having been awarded a Health Professions Scholarship for his medical school education. Dr. Thorp testified in the US Senate under the Bush administration in 2003 for his expertise in treating the fetus as a patient with in-utero therapies. Most recently Dr. Thorp has focused his research efforts on the COVID-19 pandemic and published several peer-reviewed scientific publications documenting the dangers of the vaccine in women of reproductive age and in pregnancy

Dr. Wolf summarized a video interview in which Dr. Thorp presented a picture of a placenta of a woman who was in her third trimester of pregnancy and had received the Pfizer Covid vaccine 8 weeks prior. He said this is not uncommon in placentas 8 weeks post-vaccination, and he's noticing a pattern of this state of the placenta. There's a netting of calcification that's not meant to be there. The white area surrounding the placenta lobes represents calcifications from serious inflammation. Typically this finding is associated with the slowing of the growth of the fetus, reduced amniotic fluid volume, and abnormal fetal surveillance testing. The dark circle on the right may be indicative of a blood clot.

This woman took a Covid shot and now she has a seriously compromised placenta and a baby in danger. The FDA, the CDC, and Pfizer themselves have all strongly recommended, and in some situations mandated that pregnant women get a Pfizer vaccine (in order to keep their job, for example). This is not the result that should occur from ANY drug, let alone one that was coerced onto an entire population at once, without proper studies.

Dr. Chris Flowers, a member of the Daily Clout research team put together this side-by-side image of what a placenta should look like, versus the vaccinated one.

...

So we see the effects of the vaccine on the placenta compared with a normal uniform grey color found on routine ultrasound discussed by @DrNaomiRWolf abnormal image from @Jamesathorpmid With the uptake of LNPs in both the #ovaries and the #testes makes me wonder if we will see abnormal scrotal ultrasound as well. I will keep an eye on the literature

Of course, over a year ago Dr. Wolf got blocked by the NYT and de-platformed by Twitter for pushing back on the notion that the Covid vaccines were safe and effective for pregnant women and asking to see the studies.

Listen to the Women!

As a long-time journalist with a focus on female health and reproductive issues, Dr. Wolf has understood for a long time that if you want to pick up on signals that are happening to women, you need to LISTEN to the women. Women speak to each other, and nurses speak to each other. Anecdotes were coming out early and often, with nurses talking about delivering babies early because of damage to placentas, and moms discussing concerns over developmental delays that they noticed in babies born after their pregnant mothers got vaccinated.

There is now a constantly growing pile of evidence regarding harm to vaccinated women and their babies, and the image provided by Dr. Thorp will be added to the list of

anecdotes, data sets, and evidence that is being gathered on this topic. Just to mention a few other examples:

- There was an [article written](#) back in April in the Epoch Times detailing Dr. Thorp's experience as a high-risk obstetrician, and the unprecedented changes he's seen take place since the vaccine rollout

'What I've Seen in the Last 2 Years Is Unprecedented': Physician on COVID Vaccine Side Effects on Pregnant Women

Former Pfizer VP: 'Adverse impacts on conception and ability to sustain a pregnancy were foreseeable'

Dr. James Thorp is an extensively published 68-year-old physician MD board-certified in obstetrics and gynecology, as well as maternal-fetal medicine, who has practiced obstetrics for over 42 years.

Thorp told The Epoch Times that he sees 6,000–7,000 high-risk pregnant patients a year and has seen many complications among them due to the COVID vaccines.

"I've seen many, many, many complications in pregnant women, in moms and in fetuses, in children, offspring," Thorp said, "fetal death, miscarriage, death of the fetus inside the mom.

"What I've seen in the last two years is unprecedented," Thorp asserted.

Thorp explained that although he has seen an increase in fetal death and adverse pregnancy outcomes associated with the COVID-19 vaccination, attempts to quantify this effect are hampered by the imposition of gag orders on physicians and nurses that were imposed in September 2021, as reviewed in the publication "Patient Betrayal: The Corruption of Healthcare, Informed Consent and the Physician-Patient Relationship" ([pdf](#)).

- BBC Scotland [reported 10-year highs](#) in neonatal deaths. Starting from Nov 2021, the neonatal death rate spiked so high that it triggered automatic investigations into the matter.

Call to Action

Dr. Thorp and Dr. Ryan Cole are in the planning stages of collaborating to do a pathological analysis on pieces of the placenta from women who got vaccinated during their pregnancy and compare them to ultrasound images with spike protein stains. **They need some resources, and hopefully, someone reading this will be able to help! They need some clinicians and funding in order to move forward.** Please comment below if you might be able to help.

For a broader understanding of Dr. James Thorp's experience and concerns, check out this conversation he had last week. He discussed how he was swayed to change his mind

about the safety of the Covid vaccines- hopefully, many more are on the brink of doing the same.

Dr. James Thorp: "What is Pfizer and Moderna hiding
