

The Canadian Weather Modification FOI is Here

The Blind are Going to Have to Eat their Words.

Amandha Dawn Vollmer
Nov 2

21

11

Do you have people in your life who gaslight you when you point to the hazy sky at airplanes crisscrossing above, blanketing our beautiful blue skies with cloud-seeding gunk, hiding our life-giving sun, as they say, “that’s just water vapour, chemtrails are a conspiracy theory,” and that’s the end of the discussion? Well, now, you can sit them down and read to them from the 54-page FOI we just received and have them eat their words (just in case they are illiterate as well as blind). Here is the letter that came with it. Now, mind you, this FOI is “lightweight” as it only shows us a small fraction of the cloud seeding activities happening in one province in Canada (Alberta). Regardless, it’s solid evidence that not only has it been happening, but it’s been going on for a very long time.

Table 1. Seeding activity through 2021.

<i>Season</i>	<i>Storm Days With Seeding</i>	<i>Aircraft Missions (Seeding & Patrol)</i>	<i>Total Flight Time (hours)</i>	<i>Number of Storms Seeded</i>	<i>Total Seeding Agent (kg)</i>	<i>Seeding Agent Per Day (kg)</i>	<i>Seeding Agent Per Hour (kg)</i>	<i>Seeding Agent Per Storm (kg)</i>	<i>Ejectable Flares</i>	<i>Burn-in-place Flares</i>	<i>Seeding Solution (gallons)**</i>	<i>Season Activity Rank</i>
2021	15	57	159.9	35	213.6	15.3	1.34	6.10	3391	972	0.0	24
Mean	30	105	218.4	86	227.2	7.9	1.05	2.85	5320	733	167.8	
2020	23	111	256.2	71	305.1	13.3	1.19	4.30	6722	1066	177.4	9

1996*	29	71	159.1	75	163.3	5.6	1.00	2.20	3817	542	80.5	21
<i>*The 1996 and 1997 seasons began on June 15, not June 1, which has been the norm ever since.</i>												
<i>**Use of seeding solution was discontinued beginning in 2021. The mean shown reflects previous seasons only.</i>												

Cloud Seeding has been going on for a lot longer than this.

I have been aware of geoengineering since 2003 and have tried in my every capacity to wake people out of their hypnotic daze so we can take action to halt it. I have compiled vast resources on the topic, of which there are many to find with a simple internet search. The sheer amount of data on this topic can be overwhelming, with agencies and UN-backed groups holding conferences on how to dominate the “climate” for decades, while people parrot their TV brainwashing, demonizing people working hard to raise awareness of these dangerous activities in an attempt to protect future generations from the impending

disastrous consequences of the fake climate change lying scam globalists UN 2030 Agenda (which they also think is a conspiracy, sigh).

Bought scientists pushing consensus science (not science!) of the LIE called climate change and its "fix", geoengineering. Here are the faces of fraud.

Recently, I became frustrated anew at the level of spraying over my Ontario, Canada acreage and decided to find out where the lawsuits are, why is it still continuing unabated, where the transparency is, and how can we come at this again to raise public awareness and outcry...but mainly to stop the various covert programs in their tracks.

Not one to linger in victimhood mentality, I took direct action using multiple techniques and devices to attempt to clear the milky haze out of the sky above my property with varying success (orgone, vinegar (more), cloudbusters, meditation with intention).

It's not enough for me. These maniacs must be stopped.

Remember when the **founder of The Weather Channel**, an educated and trained meteorologist, came out calling climate change the hoax that it is? Where have people with brains gone off to? I bet one component is all the **aluminum oxide, barium (more), lithium, calcium chloride** and silver salts they are spraying us with.

They are creating **weather warfare** for many reasons. For one, to shove the lie of climate change down our throats to usher in the absolute unscientific nonsense of carbon as “bad” and therefore humans as “dangerous” and in need of tighter control (**when carbon is actually good for plant life and life in general**). Carbon footprint, carbon credits, carbon tax, telling you what you can or can’t eat, drink or do...it’s a freedom and dolla-dolla bill grab and an obvious one, for those with eyes to see. They want to reduce carbon, a totally false theory, but WE are carbon... it’s new world order language for “we want to reduce YOU.

They will wax all saviour-complex in true narcissistic style, excusing their cloud seeding as something heroic (sounds quite similar to another false-hero game, ah yes, that of suppressive modern medicine) and “safe” to prevent large hail, to dull down large storms, to reduce drought, and to prevent farmers’ fields from flooding. If that were true, then weather disasters should be reducing **and not rising. Hail should be smaller, food should be aplenty with prices falling** and abundance everywhere, except that it’s not. If this were true, they **wouldn’t** be spraying pretty much EVERY DAY, flying up into blue skies, criss-crossing a mess up there, making “wisps of clouds” and turning our glorious sky into a milk-wash. I’ve witnessed far too much lying and corruption from these cracker jacks to fall for a sweet little cover story such as that.

Message to the sprayers - your gunk doesn’t work, your reasons for doing it are lies, and you are damaging life with your actions. We demand you halt!

Their Hegelian Dialectic methods of problem/reaction/solution (a Marxist idea of wooden trichotomies that stems from the **philosopher G.W.F. Hegel... Karl Popper wrote a lot about it** too) is an adaptation of the idea whereby one creates a problem (thesis), for example, the bullshit that the ice caps are melting (**they aren’t**) or sea levels are rising (**also not happening**), then creating a tension (antithesis) where people are angry and demand their handlers provide a solution (to the lie they just made up), resulting in “the solution” (resolution of the tension) which moves the goal posts into more of the same trichotomy behaviour, something begrudgingly called the totalitarian tip-toe. This is the evil game the fuckers in governments, their handlers the WEF, and THEIR handlers the **Black Nobility** play.

On May 22, 2022, I had a call with [human rights attorney Leigh Dundas](#) to ask her how she would approach a successful lawsuit. She thought it would work best as a grassroots movement-style class-action lawsuit based on one or two specific chemicals they are spraying, linking these chemicals to the causation of harm, either in man or in nature. This means gathering scientific and medical data, compiling it, getting “experts” to testify and of course raising the funds for the evidence gathering. We discussed whether or not the programs impinged more so on personal or property rights, were we able to find a “commonality of claim” (for example the same chemical causing the same damage), and said that class action lawsuits generally have their own funding so it is a more affordable route to take. She said to “shop law firms” and gather the various action groups together for a more effective front. Using templates of successful [organophosphate lawsuits](#) from aerial spraying could be an effective approach.

Wayne from [Ethics Over Fear](#), learning that I was researching lawsuits and seeking a Canadian opinion, introduced me to Alberta attorney Tony Vacca, who had presented a Federal Crown [Charter challenge in the courts](#) in 2020. When I spoke with Tony and another of his team named Henry on May 25, 2022, he informed me that the court seemed “concerned” but really didn’t know what to do with the information, so it was dismissed. They have plans to appeal. Despite the massive levels of evidence of geoengineering programs happening in Canada and worldwide, one of the major problems is finding the target of the lawsuits and the correct avenue to halt the spraying, [HAARP](#), [ELAT](#), [Woodpecker](#), [NEXRAD](#), and other [experimental cloudseeding projects](#), etc. He suggested one of the main roadblocks was the lack of enough noise coming out of at least 4 Countries simultaneously, that if this happened it would be too big for them to ignore. He also stated that the gold standard for the court would be air samples but are expensive to gather; in the realm of close to a million dollars to produce. He said allies he’s been aligned with include [Marvin Herndon](#), a nuclear scientist (how odd that his videos have been scrubbed! Super weird! <insert eye roll here>) and [Bill Vanderzan](#), former premier of British Columbia.

Then I reached out to my friend [Christine Massey](#) of [Fluoride Free Peel](#), since she is a wiz at Freedom of Information Requests (FOIs), and asked her if she would assist by requesting one to the Canadian Government about their geoengineering programs. [Today it arrived](#) and my goodness is it ever fascinating!

Annual Report of Alberta Severe Weather Management Society Hail Suppression Efforts

2020 Operations – June 1 through 15 September

Information prepared by Weather Modification LLC, dba Weather Modification International (WMI)

info@weathermod.com, www.weathermod.com

All cloud seeding flights were conducted in accordance with the scientific principles described in the *Notice of Intent to Engage in Weather Modification Activities* submitted to Environment Canada on May 29, 2020, within the limits of the operations area delineated therein.

Accordingly, some acronyms used in the following tables require explanations, provided below.

Missions by Type (top left table)

Total time – the elapsed time from engine start to engine stop.

Air time – the elapsed time from takeoff to landing.

SEED – time flown on missions during which any seeding was conducted, regardless of amount.

PATROL – time flown in anticipation of encountering potential severe weather, when seeding did not occur.

REPO – (Reposition) time flown when aircraft were flown to other airports in anticipation of severe weather.

PR – flights made to the project operations centre for the purposes of the insurance industry-accredited lectures.

DUAL – flights flown for dual-mode seeding, that is, the combined use of ice-forming and drop-forming seeding agents.

MX – maintenance flights. Maintenance flights were to ensure functionality after repairs, and at the expense of WMI.

Aircraft Identifiers

Hailstop #1, HS1 – tail number N904DK, based in Springbank

Hailstop #2, HS2 – tail number N457DM, based in Springbank

Hailstop #3, HS3 – tail number N127ZW, based in Red Deer

Hailstop #4, HS4 – tail number N37356, based in Red Deer

Hailstop #5, HS5 – tail number N518TS, based in Springbank

Flare Usage (by aircraft, top right table)

BIP – burn-in-place flare, contains 150g of ice-forming seeding agent

HBIP – burn-in-place flare, contains 1000g of drop-forming seeding agent (salt)

EJ – ejectable flare, contains 20g of ice-forming seeding agent

BURNER MINS – the length of time wing-tip borne ice-forming seeding solution generators were operated

TOTAL GRAMS – the total mass of seeding agent released in each category, in grams.

Flight Time (by aircraft, by month, found below the *Flare Usage* table)

Self-explanatory.

TOTAL HOURS – the total time flown by all five Hailstop aircraft in each month, given in hours and minutes.

Operations Summary (the large table that comprises the remainder of the document)

Flights – the total number of flights flown for project purposes (not maintenance)

UTC DATE – Universal Time Coordinates, or UTC, is used worldwide for all meteorological and aviation purposes. UTC is six hours ahead of Mountain Daylight Time (MDT), so to convert UTC to MDT, subtract six hours.

HAILSTOP – the aircraft flying the mission, e.g. HS2 = Hailstop 2, based in Springbank (see Aircraft Identifiers, above)

OPS # – The flight number for each specific aircraft, used only for administrative purposes.

ENGINES ON – the UTC time engines were started for that mission.

ENGINES OFF – the UTC time engines were shut down after that mission.

TOTAL TIME – the time the engines ran, in hours and minutes.

MISSION TYPE – see *Missions by Type*, above.

EJ # – the number of ice-forming EJ flares expended on the mission.

BIP # – the number of ice-forming BIP flares expended on the mission.

HYGRO # – the number of droplet-forming hygroscopic (salt) flares expended on the mission.

In this vanilla coated FOI, they admit to spraying two main chemicals: calcium chloride and “ice flares” which are a combination chemical of acetone, silver iodide, sodium perchlorate, paradichlorobenzene and ammonium iodine that create an ice nuclei of iodide-silver chloride-salt and *carbon dioxide*. Yes, you heard that right...they are fighting climate change but making combustion products of carbon dioxide? I think I just heard their carbon score take a dive. No more flights for you!

C. MATERIALS TO BE EMITTED:

- Cloud top (ejectable) pyrotechnic flares are 20g mass of glaciogenic formulation, ICE-EJ®, manufactured by Ice Crystal Engineering (ICE) of Kindred, North Dakota, USA (www.iceflares.com)
- Cloud base (burn-in-place) flares are 150g glaciogenic formulation, ICE-EB®, manufactured by Ice Crystal Engineering (ICE) of Kindred, North Dakota, USA (www.iceflares.com)
- A solution of acetone, silver iodide, sodium perchlorate, paradichlorobenzene, and ammonium iodide will also be burned for continuous seeding at cloud base. The products of combustion yield silver iodide-silver chloride-salt (AgI-AgCl-NaCl) ice nuclei, carbon dioxide (CO₂), and water (H₂O).
- The hygroscopic flares to be used produce a hygroscopic (water-attracting) nuclei comprised of calcium chloride (CaCl), a common salt, but a salt lacking the adverse effects of sodium chloride (NaCl) on clay soils.

Activation tests performed at Colorado State University indicate greater than 10^{14} ice crystals per gram of seeding agent burned, active at -10°C.

Total flight hours and quantities to be dispersed: We estimate the project may use 8,500 twenty-gram flares and 1,000 one hundred-fifty gram flares, plus approximately 250 gallons of the seeding solution (2% AgI by volume) will be burned. The hygroscopic CaCl flares are being used only in limited instances on a trial basis, it is likely between 100 and 200 might be burned. The number of operational days, flights, and amount of seeding material dispensed over the past 24 years is summarized in the attached table. No harmful effects from these materials is expected. This is based on years of studies (both in the USA and Canada) to detect silver in precipitation (above background levels) following cloud seeding. The amount of silver distributed by the cloud seeding is small compared to the output from industry. Silver amounts from cloud seeding are far, far less than the USA EPA guidelines.

PART 8. GENERAL INFORMATION CONCERNING USE OF AIRCRAFT.

- Three C90 King Air prop-jet aircraft, two in Springbank (N904DK and N518TS) and one based in Red Deer (N127ZW).
- Two Cessna 340 aircraft, one in Springbank (N457DM) and one in Red Deer (N37356).

PART 9. GENERAL INFORMATION CONCERNING USE OF GROUND VEHICLES.

No special project ground vehicles will be deployed for the project. (Only private vehicles for personal transportation will be used.)

PART 10. GENERAL INFORMATION CONCERNING ANY MEASUREMENTS OR OBSERVATION INSTRUMENTATION.

No special surface observations are planned for this project. The primary instrumentation is the weather radar and special aircraft instrumentation. Daily weather charts will be recorded for documentation and reporting purposes.

AIRCRAFT TRACKING GLOBAL POSITIONING SYSTEM (GPS): The WMI weather radar control and communications center will be equipped to receive and record data from the GPS aircraft tracking system. The GPS system displays the exact position of aircraft superimposed on the radar display to enable the controller to accurately direct the seeding aircraft to optimum seeding locations within the storm system. The color-coded aircraft position on the PPI will be marked with a small symbol. Electronic coding will enable radar controllers to discriminate between all project aircraft.

TEMPERATURE INSTRUMENTATION: Each of the cloud seeding aircraft will have a temperature

This FOI isn't much as far as the extent of what they are up to, (see [Dane Wigington's Geoengineering Watch website for more data](#)) nor what is happening throughout Canada, however what we do have are flight logs, times, chemical use, and evidence of cloud seeding focused on "hail stopping" and thunderstorm modification. This document should be proof enough to jar the sleepers out of their denialism about cloudseeding. However, for me at least, more importantly we have NAMES: the names of companies and people involved with this shitshow. The main problem with figuring out how to stop them is finding the culprits to sue. Now we have some places to start.

List of similar weather modification activities previously undertaken:

- a. Canada: The Alberta Hail Project has been operating in its present form since 1996. The contractor (operator) for this entire period has been WMI.
 - b. Elsewhere:
 - WMI has conducted the hail suppression cloud seeding in North Dakota for more than 50 years. This is an ongoing project.
 - WMI conducted hail suppression in Mendoza, Argentina using 3 to 4 Cheyenne II aircraft and a Lear Jet 1998-2004.
 - WMI conducted operational cloud seeding in Oklahoma for Rain Enhancement and Hail Suppression 1997-2001.
 - WMI has conducted operational cloud seeding in Alberta, Burkina Faso, California, Colorado, Idaho, UAE, India, Mali, Nevada, North Dakota, Saudi Arabia, Senegal, and Wyoming within the last 10 years.

List of subcontractors: WMI owns and operates its own fleet of aircraft and weather radars. No major sub-contractors are being used on the Alberta Hail project for aircraft or radar services. Solution Blend Services, Calgary, Alberta (403) 207-9840 will be handling and mixing seeding solutions for the project.

PART 3. GENERAL INFORMATION CONCERNING ORGANIZATION FOR WHOM ACTIVITY IS TO BE CONDUCTED.

Name of organization: Alberta Severe Weather Management Society (ASWMS)

Chief officers: Mr. Todd Klapak, President
todd.klapak@intact.net
Ms. Sherre Newell, Secretary-Treasurer
sherre.newell@aviva.com

Nature of organization: A not-for-profit society of the property and casualty insurers and brokers operating in Alberta. The society was formed for the purpose of collecting funds from its members to operate a hail suppression program to help reduce insurance payout due to hail and stabilize insurance rates throughout the province.

For now, let's keep digging, educating, strategizing and collaborating to **stop the spraying** because I cherish all life: nature is what we are meant to protect, not poison. Toying with natural systems is a HUGE mistake, the results of which we are already experiencing. There is no scary climate change, but there is **geoengineering at the hands of a few causing climate chaos** and manipulating mankind into **yet another deep delusion**, furthering their plans to create some warped one world order Orwellian dystopia. I am not leaving my daughter in this cesspool of insanity. Maybe it's time to start a company that reconstructs Reich's Cloud Busting machine to retaliate. It's time to get loud, collect names, and take action.

Amandha Dawn Vollmer holds a degree of Doctor of Naturopathic Medicine from the Canadian College of Naturopathic Medicine in Toronto and a Bachelor of Science in Agricultural Biotechnology from the University of Lethbridge. She is a professional Eclectic Natural Health Practitioner, assisting people to prevent disease and heal naturally for over 20 years.

Amandha Vollmer is passionate about health and truth and is not afraid to voice her opinion, candidly using humour to deliver the message. During these challenging times, she has been recognized as one of the brave souls to tell the truth about what's really going on in the world, encouraging and empowering people to be their own master.
