

# Independent Science on the Effects of EMF Radiation on Human Health

Updated: 3 days ago

Published : 2020, June 29 Updated September 5th, 2022!

Author: Robert O Young CPC, MSc, DSc, PhD, Naturopathic Practitioner

***Long-term exposure to wireless radiation is a proven health hazard. 5G puts your privacy, security, safety and property values at risk.***

*"Putting in tens of millions of antennae without a single test of biological safety has got to be about the stupidest idea anyone has ever had." -Martin Pall, PhD, Bioscientist, Washington State Univ.*

*"We can no longer assume that any current or future wireless technology, including 5G, is safe without adequate testing." -Dr. Ronald Melnick, PhD, U.S. Toxicology Program*

*"We're kind of flying blind [with 5G] here, so far as health and safety is concerned."*

*-U. S. Senator Richard Blumenthal (CT)*

PROJECT CAMELOT TV PRESENTS

Dr. Robert O. Young  
**CORONA  
AND 5G**

THURSDAY, APRIL 2, 2020 @ 1PM PT

**There are more than 1,000 scientific studies conducted by independent researchers from around the world concerning the biological effects of RF radiation. Here we present some of the most recent.**

- I. Effects on Fetal and Newborn Development
- II. Effects on Young Children
- III. Brain Tumors
- IV. Parotid Gland Tumors
- V. Other Malignancies
- VI. Effects on DNA
- VII. Neurological/Cognitive Effects
- VIII. Effects on Male Fertility
- IX. Electromagnetic Sensitivity
- X. Effects on Implanted Medical Devices
- XI. 5G Effects

- XII Miscellaneous Articles

## *1. Effects On Fetal And Newborn Development*

1. Mother's Exposure to Electromagnetic Fields Before and During Pregnancy is Associated with Risk of Speech Problems in Offspring. Zarei, S., et al. *Journal of Biomedical Physics and Engineering* 9(1):61-68 (2019).
2. Prenatal Exposure to Extremely Low Frequency Magnetic Field and Its Impact on Fetal Growth. Ren, Y., et al. *Environmental Health* (2019).
3. The Effects of Radio Frequency Radiation on Mice Fetus Weight, Length and Tissues. Alimohammadi, I., et al. *Data in Brief* 19:2189-2194 (2018).
4. Effects of Prenatal Exposure to WiFi Signal (2.45 GHz) on Postnatal Development and Behavior in Rat: Influence of Maternal Restraint. Othman, H., et al. *Behavioral Brain Research* 326: 291-301 (2017).
5. Exposure to Magnetic Field Non-Ionizing Radiation and the Risk of Miscarriage: A prospective Cohort Study. Li, De-Kun, et al. *Scientific Reports* (2017).
6. Postnatal Development and Behavior Effects of In-Utero Exposure of Rats to Radiofrequency Waves Emitted From Conventional WiFi Devices. Othman, H., et al. *Environmental Toxicology and Pharmacology* 52:239-247 (2017).
7. Lasting Hepatotoxic Effects of Prenatal Mobile Phone Exposure. Yilmaz, A., et al. *The Journal of Maternal-Fetal & Neonatal Medicine* 30(11): 1355-1359 (2017).

8. Multiple Assessment Methods of Prenatal Exposure to Radio Frequency Radiation from Telecommunication in the Mothers and Children's Environmental Health (MOCEH) Study. Choi, Ha, et al. *International Journal of Occupational Medicine and Environmental Health* 29(6):959-972 (2016).
9. The Use of Signal-Transduction and Metabolic Pathways to Predict Human Disease Targets from Electric and Magnetic Fields Using in vitro Data in Human Cell Lines. Parham, Portier, et al. *Frontiers in Public Health* (2016).
10. A Review on Electromagnetic Fields (EMFs) and the Reproductive System. Asghari, Khaki, et al. *Electronic Physician* 8(7):2655-2662 (2016).
11. Genotoxicity Induced by Foetal and Infant Exposure to Magnetic Fields and Modulation of Ionising Radiation Effects. Udroui, Antoccia, et al. *PLoS One* (2015).
12. Oxidative Stress of Brain and Liver is Increased by Wi-Fi (2.45 GHz) Exposure of Rats During Pregnancy and the Development of Newborns. Çelik, Ömer, et al. *Journal of Chemical Neuroanatomy* 75(B):134-139 (2015).
13. Neurodegenerative Changes and Apoptosis Induced by Intrauterine and Extrauterine Exposure of Radiofrequency Radiation. Güler, Gökür, et al. *Journal of Chemical Neuroanatomy* 75(B):128-133 (2015).
14. Maternal Exposure to a Continuous 900-MHz Electromagnetic Field Provokes Neuronal Loss and Pathological Changes in Cerebellum of 32-Day-Old Female Rat Offspring. Odaci, Ersan, et al. *Journal of Chemical Neuroanatomy* 75(B):105-110 (2015).
15. Different Periods of Intrauterine Exposure to Electromagnetic Field: Influence on Female Rats' Fertility, Prenatal and Postnatal Development. Alchalabi, Aklilu, et al. *Asian Pacific Journal of Reproduction* 5(1):14-23 (2015).
16. Use of Mobile Phone During Pregnancy and the Risk of Spontaneous Abortion. Mahmoudabadi, Ziaei, et al. *Journal of Environmental Health Science and Engineering* 13:34 (2015).
17. Oxidative Mechanisms of Biological Activity of Low-Intensity Radiofrequency Radiation. Yakymenko, et al. *Electromagnetic Biology and Medicine* 34(3):1-16 (2015).
18. Effects of Prenatal 900 MHz Electromagnetic Field Exposures on the Histology of Rat Kidney. Ulubay, et al. *International Journal of Radiation Biology* 91(1):35-41 (2015).
19. The Effect of Exposure of Rats During Prenatal Period to Radiation Spreading from Mobile Phones on Renal Development. Bedir, et al. *Renal Failure* 37(2):305-9 (2014).
20. Dosimetric Study of Fetal Exposure to Uniform Magnetic Fields at 50 Hz. Liorni, et al. *Bioelectromagnetics* 35(8):580-97 (2014).
21. Influence of Pregnancy Stage and Fetus Position on the Whole-Body and Local Exposure of the Fetus to RF-EMF. Varsier, et al. *Physics in Medicine and Biology* 59(17):4913-26 (2014).
22. Autism-Relevant Social Abnormalities in Mice Exposed Perinatally to Extremely Low Frequency Electromagnetic Fields. Alsaeed, et al. *International Journal of Developmental Neuroscience* 37:58-6 (2014).
23. Pyramidal Cell Loss in the Cornu Ammonis of 32-day-old Female Rats Following Exposure to a 900 Megahertz Electromagnetic Field During Prenatal Days 13–21. Bas, et al. *NeuroQuantology* Volume 11, Issue 4: 591-599 (2013).
24. The Effects of 900 Megahertz Electromagnetic Field Applied in the Prenatal Period on Spinal Cord Morphology and Motor Behavior in Female Rat Pups. Odaci, et al. *NeuroQuantology* Volume 11, Issue 4: 573-581 (2013).
25. Fetal Radiofrequency Radiation Exposure From 800-1900 MHz-Rated Cellular Telephones Affects Neurodevelopment and Behavior in Mice. Aldad, Gan, et al. *Scientific Reports* 2(312) (2013).

26. Cranial and Postcranial Skeletal Variations Induced in Mouse Embryos by Mobile Phone Radiation. Fragopoulou, Koussoulakos, et al. *Pathophysiology* 17(3):169-77 (2010).
27. Dysbindin Modulates Prefrontal Cortical Glutamatergic Circuits and Working Memory Function in Mice. Jentsch, et al *Neuropsychopharmacology* 34, 2601-8 (2009).
28. Stress Signalling Pathways that Impair Prefrontal Cortex Structure and Function. Arnsten, A. F. *National Review of Neuroscience* 10, 410-22 (2009).
29. Maternal Occupational Exposure to Extremely Low Frequency Magnetic Fields and the Risk of Brain Cancer in the Offspring. Li, McLaughlin, et al. *Cancer Causes & Control* 20(6):945-55 (2009).
30. Reproductive and Developmental Effects of EMF in Vertebrate Animal Models. Pourlis, A.F. *Pathophysiology* 16(2-3):179-89 (2009).
31. Prenatal and Postnatal Exposure to Cell Phone Use and Behavioral Problems in Children. Divan, Kheifets, et al. *Epidemiology* 19(4):523-29 (2008).
32. Effects of Prenatal Exposure to a 900 MHz Electromagnetic Field on the Dentate Gyrus of Rats: A Stereological and Histopathological Study. Odaci, et al. *Brain Research* 1238: 224-229 (2008).
33. Exposure to Cell Phone Radiation Up-Regulates Apoptosis Genes in Primary Cultures of Neurons and Astrocytes. Zhao, et al. *Science Digest* 412: 34-38 (2007).
34. Cell Death Induced by GSM 900-MHz and DCS 1800-MHz Mobile Telephony Radiation. Panagopoulos, et al. *Mutation Research* 626, 69-78 (2006).
35. Ultra High Frequency-Electromagnetic Field Irradiation During Pregnancy Leads to an Increase in Erythrocytes Micronuclei Incidence in Rat Offspring. Ferreira, Knakiewicz, et al. *Life Sciences* 80(1):43-50 (2006).
36. Attention-Deficit Hyperactivity Disorder. Biederman, J. & Faraone, S. V. *Lancet* 366, 237-248 (2005).
37. Attention-Deficit/Hyperactivity Disorder: An Overview of the Etiology and a Review of the Literature Relating to the Correlates and Lifecourse Outcomes for Men and Women. Brassett-Harknett, A. & Butler, N. *Clinical Psychology Review* 27,188-210 (2005).

## II. Effects On Young Children

1. Electromagnetic Fields, Pulsed Radiofrequency Radiation, and Epigenetics: How Wireless Technologies May Affect Childhood Development. Sage, C. & Burgio, E. Child Development (2017).
2. Prospective Cohort Analysis of Cellphone Use and Emotional and Behavioural Difficulties in Children. Sudan, M, et al. Journal of Epidemiology and Community Health (2016).
3. Why Children Absorb More Microwave Radiation than Adults: The Consequences. Morgan, Kesari, et al. Journal of Microscopy and Ultrastructure 2(4):196-204 (2014).
4. Epidemiological Characteristics of Mobile Phone Ownership and Use in Korean Children and Adolescents. Byun, Yoon-Hwan, et al. Environmental Health and Toxicology 28 (2013).
5. A Prospective Study of In-Utero Exposure to Magnetic Fields and the Risk of Childhood Obesity. Li, De-Kun, et al. Scientific Reports 2:540 (2012).
6. Exposure to Extremely Low-Frequency Magnetic Fields and the Risk of Childhood Cancer: Update of the Epidemiological evidence. Schüz and Joachim. Progress in Biophysics and Molecular Biology 107(3):339-42 (2011).

7. Cell Phone Use and Behavioural Problems in Young Children. Divan, Kheifets, et al. *Journal of Epidemiol Community Health* 66(6):524-9 (2010).
8. Mobile Phones, Radiofrequency Fields, and Health Effects in Children-Epidemiological Studies. Feychting, Maria. *Progress in Biophysics and Molecular Biology* 107(3):343-348 (2010).
9. Exposure to Radio-Frequency Electromagnetic Fields and Behavioral Problems in Bavarian Children and Adolescents. Thomas, Silke, et al. *European Journal of Epidemiology* 25(2):135-41 (2009).
10. The Sensitivity of Children to Electromagnetic Fields. Repacholi, et al. *Deventer. Journal of Pediatrics* 116(2):303-313 (2005).

### **III. Brain Tumors**

1. Simulation of The Incidence of Malignant Brain Tumors in Birth Cohorts That Started Using Mobile Phones When They First Became Popular in Japan. Sato, Y., Kojimahara, N., and Yamaguchi, N. *Bioelectromagnetics* 40(3): 143-149 (2019).
2. Report of Final Results Regarding Brain and Heart Tumors in Sprague-Dawley Rats Exposed From Prenatal Life Until Natural Death to Mobile Phone Radiofrequency Field Representative of a 1.8 GHz GSM Base Station Environmental Emission. Falcioni, L, et al. *Environmental Research* (2018).
3. Exposure to Cell Phone Radiofrequency Changes Corticotrophin Hormone Levels and Histology of The Brain and Adrenal Glands in Male Wistar Rat. Shahabi, S., et al. *Iranian Journal of Basic Medical Sciences* 21:1269-1274 (2018).
4. Brain Tumours: Rise in Glioblastoma Multiforme Incidence in England 1995-2015 Suggests an Adverse Environmental or Lifestyle Factor. Philips, A., et al. *Journal of Environmental and Public Health* (2018).
5. The 2100 MHz Radiofrequency Radiation of a 3G-Mobile Phone and the DNA Oxidative Damage in Brain. Sahin, Ozgur, et al. *Journal of Chemical Neuroanatomy* 75(B):94-98 (2016).
6. Mobile Phone and Cordless Phone Use and the Risk for Glioma - Analysis of Pooled Case- Control Studies in Sweden 1997-2003 and 2007-2009. Hardell and Carlberg. *PathoPhysiology* 22(1):1-13 (2015).
7. Mobile Phone Radiation Causes Brain Tumors and Should Be Classified as a Probable Human Carcinogen. Morgan, Miller, et al. *International Journal of Oncology* 46:1865-1871 (2015).
8. Mobile Phone Use and Brain Tumours in the CERENAT Case-Control Study. Coureau, Bouvier, et al. *Occupational & Environmental Medicine* 71(7):514-22 (2014).
9. Use of Mobile Phones and Cordless Phones is Associated with Increased Risk for Glioma and Acoustic Neuroma. Hardell, Carberg, et al. *PathoPhysiology* 20(2):85-110 (2013).
10. Mobile Phones and Head Tumours: A Critical Analysis of Case-Control Epidemiological Studies. Levis, Minicuci, et al. *Open Environmental Sciences* 6(1):1-12 (2012).
11. On the Association Between Glioma, Wireless Phones, Heredity and Ionising Radiation. Carlberg and Hardell. *PathoPhysiology* 19(4):243-252 (2012).
12. Mobile Phones and Head Tumours. The Discrepancies in Cause-Effect Relationships in the Epidemiological Studies - How Do They Arise? Levis, Minicuci, et al. *Environmental Health* 10:59 (2011).
13. Indications of Possible Brain Tumour Risk in Mobile-Phone Studies: Should We Be Concerned? Cardis and Sadetzki. *Occupational & Environmental Medicine* 68:169-171 (2011).

14. Estimating the Risk of Brain Tumors from Cell Phone Use: Published Case-Control Studies. Morgan, LL. *Pathophysiology* 16(2-3):137-147 (2009).
15. Cell Phones and Brain Tumors: A Review Including the Long-Term Epidemiologic Data. Khurana, Teo, et al. *Surgical Neurology* 72(3):205-14 (2009).
16. Epidemiological Evidence for an Association Between Use of Wireless Phones and Tumor Diseases. Hardell, Carlberg, et al. *Pathophysiology* 16(2-3):113-122 (2009).
17. Histopathological Examinations of Rat Brains After Long-Term Exposure to GSM Mobile Phone Radiation. Grafström, Gustav, et al. *Brain Research Bulletin* 77(5):257-63 (2008).
18. Mobile Phone Use and the Risk of Acoustic Neuroma. Lonn, Ahlbom, et al. *Epidemiology* 15(6):653-659 (2004).

## **IV. Parotid Gland Tumors**

1. Influence of Handheld Mobiles on Parotid: A Cohort Study. Ranjitha, G., et al. *Journal of Indian Academy of Oral Medicine & Radiology* 29:254-258 (2017).
2. Does Cell Phone Use Increase the Chances of Parotid Gland Tumor Development? A Systematic Review and Meta-Analysis. De Siqueira, de Souza, et al. *Journal of Oral Pathology and Medicine* 45(11) (2016).

3. Pooled Analysis of Case-Control Studies on Acoustic Neuroma Diagnosed 1997-2003 and 2007- 2009 and Use of Mobile and Cordless Phones. Hardell, Carlberg, et al. *International Journal of Oncology* 43(4):1036-144 (2015).
4. Using the Hill Viewpoints from 1965 for Evaluating Strengths of Evidence of the Risk for Brain Tumors Associated with use of Mobile and Cordless Phones. Hardell and Carlberg. *Reviews on Environmental Health* 28(2-3):97-106 (2013).
5. Case-Control study of the Use of Mobile and Cordless Phones and the Risk for Malignant Melanoma in the Head and Neck Region. Hardell, Carlberg, et al. *Pathophysiology* 18(4):325-333 (2011).
6. Correlation Between Cellular Phone Use and Epithelial Parotid Gland Malignancies. Duan, Zhang, et al. *Clinical Paper Head and Oncology* 40(9):966-7 (2011).
7. Mobile Phones Use and Risk of Tumors: A Meta-Analysis. Mynf, Ju, et al. *Journal of Clinical Oncology* 27(33):5565-72 (2009).
8. Mobile Phone, Cordless Phones and the Risk for Brain Tumours. Hardell and Carlberg. *International Journal of Oncology* 35(1):5-17 (2009).
9. Public Health Implications of Wireless Technologies. Sage and Carpenter. *PathoPhysiology* 16(2-3):233-46 (2009).
10. Epidemiological Evidence for an Association Between use of Wireless Phones and Tumor Diseases. Hardell, Carlberg, et al. *PathoPhysiology* 16(2-3):113-122 (2009).
11. Cell Phone Use and Risk of Benign and Malignant Parotid Gland Tumors - A Nationwide Case- Control Study. Sadetzki, Chetrit, et al. *American Journal of Epidemiology* 167(4):457-467 (2008).

## **V. Other Malignancies**

1. The Carcinogenic Potential of Non-Ionizing Radiations: The Cases of S-50 Hz MF and 1.8 GHz GSM Radiofrequency Radiation. Soffritti, M. and Giuliani, L. *Basic & Clinical Pharmacology & Toxicology* (2019).
2. Tumor Promotion by Exposure to Radiofrequency Electromagnetic Fields Below Exposure Limits for Humans. Lerchl, Klose, et al. *Biochemical and Biophysical Research Communications* 459(4):585-590 (2015).
3. Swedish Review Strengthen Grounds for Concluding that Radiation from Cellular and Cordless Phones is a Probable Human Carcinogen. Davis, Kesari, et al. *Pathophysiology* 20(2):123-129 (2013).
4. Multifocal Breast Cancer in Young Women with Prolonged Contact Between Their Breasts and Their Cellular Phones. West, Kapoor, et al. *Case Reports in Medicine* (2013).
5. Epidemiological Evidence for an Association Between Use of Wireless Phones and Tumor Diseases. Hardell, Carlberg, et al. *PathoPhysiology* 16(2-3):113-122 (2009).
6. Study on Potential Effects of "902 MHz GSM-type Wireless Communication Signals" on DMBA-Induced Mammary Tumours in Sprague-Dawley Rats. Hruby, Neubauer, et al. *Mutation Research* 649(1-2):34-44 (2008).

## **VI. Effects On DNA**

1. Microwaves from Mobile Phones Inhibit 53BP1 Focus Formation in Human Stem Cells More Strongly Than in Differentiated Cells: Possible Mechanistic Link to Cancer Risk. Markova, Malmgren, et al. *Environmental Health Perspectives* 118(3):394-399 (2010).

2. Radiofrequency Radiation and Gene/Protein Expression: A Review. McNamee and Chauhan. *Radiation Research* 172(3):265-287 (2009).
3. Evaluation of HSP70 Expression and DNA Damage in Cells of a Human Trophoblast Cell Line Exposed to 1.8GHz Amplitude-Modulated Radiofrequency Fields. Valbonesi, Franzellotto, et al. *Radiation Research* 169(3):270-279 (2008).
4. Gene and Protein Expression Following Exposure to Radiofrequency Fields from Mobile Phones. Vanderstraeten and Verschaeve. *Environmental Health Perspectives* 116(9):1131-5 (2008).
5. Nonthermal Effects of RadioFrequency-Field Exposure on Calcium Dynamics in Stem Cell- derived Neuronal Cells: Elucidation of Calcium Pathways. Rao, Titushkin, et al. *Radiation Research* 169(3):319-329 (2008).
6. Gene Expression Changes in the Skin of Rats Induced by Prolonged 35 GHz Millimeter-Wave Exposure. Millenbaugh, Roth, et al. *Radiation Research* 169(3):288-300 (2008).
7. DNA Damage in Molt-4 T-lymphoblastoid Cells Exposed to Cellular Telephone Radiofrequency Fields in Vitro. Philips, Ivaschuk, et al. *Bioelectrochemistry and Bioenergetics* 45(1):103-110 (1998).

## **VII. Neurological/Cognitive Effects**

1. Early-Life Exposure to Pulsed LTE Radiofrequency Fields Causes Persistent Changes in Activity and Behavior in C57BL/6 J Mice. Broom, K., et al. *Bio Electro Magnetism* 40(7):498-511 (2019).
2. Are Rises in Electro-Magnetic Field in The Human Environment, Interacting with Multiple Environmental Pollutions, The Tripping Point for Increases in Neurological Deaths in the Western World? Pritchard, C., Silk, A. and Hansen, L. *Medical Hypotheses* 127: 76-83 (2019).
3. Effect of 1800-2100 MHz Electromagnetic Radiation on Learning-Memory and Hippocampal Morphology in Swiss Albino Mice. Kishore, G., Venkatesh, K., and Sridevi, N. *Journal of Clinical and Diagnostic Research* 12(2): 14-17 (2019).
4. Monitoring of BALB/C Strain Mice Health, Investigation of Behavior, Hematological Parameters Under the Effect of an Electromagnetic Field. Zymantiene, J., et al. *Medycyna Weterynaryjna* 75(03): 158-163 (2019).
5. 2.45 GHz Microwave Radiation Impairs Learning, Memory, and Hippocampal Synaptic Plasticity in The Rat. Karimi, N., et al. *Toxicology and Industrial Health* 34(12): 873-883 (2018).
6. Mobile Phone Distance From Head and Temperature Changes of Radio Frequency Waves on Brain Tissue. Forouharmajd, F., Ebrahimi, H. and Pourabdian, S. *International Journal of Preventative Medicine* (2018).
7. A Prospective Cohort Study of Adolescents' Memory Performance and Individual Brain Dose of Microwave Radiation from Wireless Communication. Foerster, M., et al. *Environmental Health Perspectives* 126(7) (2018).
8. Electromagnetic Radiation 2450 MHz Exposure Causes Cognition Deficit with Mitochondrial Dysfunction and Activation of Intrinsic Pathway of Apoptosis in Rats. Gupta, S.K., Mesharam, M.K., and Krishnamurthy, S. *Journal of Biosciences* 43(2) 263-276 (2018).
9. The Effect of Wi-Fi Electromagnetic Waves in Unimodal and Multimodal Object Recognition Tasks in Male Rats. Hassanshahi, A., et al. *Neurological Sciences* 38(6):1069-1076 (2017).
10. Effects of Short and Long Term Electromagnetic Fields Exposure on the Human Hippocampus. Deniz, O.G., et al. *Journal of Microscopy and Ultrastructure* 5(4):191-197 (2017).

11. Effects of Long Term Exposure of 900-1800 MHz Radiation Emitted from 2G Mobile Phone on Mice Hippocampus – A Histomorphometric Study. Mugunthan, Shanmugasamy, et al. *Journal of Clinical and Diagnostic Research* 10(8):AF01-6 (2016).
12. Effect of Mobile Phone Radiation on Pentylenetetrazole-Induced Seizure Threshold in Mice. Kouchaki, Motaghedifard, et al. *Iranian Journal of Basic Medical Sciences* 19(7):800-3 (2016).
13. Effects of 3 Hz and 60Hz Extremely Low Frequency Electromagnetic Fields on Anxiety-Like Behaviors, Memory Retention of Passive Avoidance and ElectroPhysiological Properties of Male Rats. Rostami, Shahani, et al. *J Lasers Medical Science* 7(2):120-125 (2016).
14. Short-Term Memory in Mice is Affected by Mobile Phone Radiation. Ntzouni, Stamatakis, et al. *PathoPhysiology* 18(3):193-199 (2011).
15. Use of Mobile Phones and Changes in Cognitive Function in Adolescents. Thomas, Benke, et al. *Occupational Environmental Medicine* 67(12):861-866 (2010).
16. Increased Blood-Brain Barrier Permeability in Mammalian Brain 7 Days After Exposure to the Radiation from a GSM-900 Mobile Phone. Nittby, Brun, et al. *PathoPhysiology* 16(2-3):103-112 (2009).
17. Effects of GSM 1800 MHz on Dendritic Development of Cultured Hippocampal Neurons. Ning, Xu, et al. *Acta Pharmacol Sin* 28(12):1873-1880 (2007).
18. Neurological Effects of Radiofrequency Electromagnetic Radiation. Lai, Henry. *Advances in Electromagnetic Fields in Living Systems* 1:27-80 (1994).

## **VIII. Effects On Male Fertility**

1. Long-Term Exposure to 4G Smartphone Radiofrequency Electromagnetic Radiation Diminished Male Reproductive Portential by Directly Disrupting Spck3-MMP2-BTB Axis in the Testes of Adult Rats. Yu, G., et al. *Science of The Total Environment* 698 (2020).
2. Radiations and Male Fertility. Kesari, K., Agarwal, A. and Henkel, R. *Reproductive Biology and Endocrinology* 16(118) (2018).
3. The Effect of 2.45 GHz Non-Ionizing Radiation on the Structure and Ultrastructure of The Testis in Juvenile Rats. Šimaiová, V., et al. *Histology and Histopathology* 34(4):391-403 (2018).
4. Modulatory Effect of 900 MHz Radiation on Biochemical and Reproductive Parameters in Rats. Narayana, SN., et al. *Bratislava Medical Journal* 119(9):581-587 (2018).
5. Aloe Arborescens Juice Prevents EMF-Induced Oxidative Stress and Thus Protects from Pathophysiology in the Male Reproductive System In Vitro. Solek, P., Majchrowics, L., and Koziorowski, M. *Environmental Research* 166:141-149 (2018).
6. Radiofrequency Radiation (900 MHz)-Induced DNA Damage and Cell Cycle Arrest in Testicular Germ Cells in Swiss Albino Mice. Pandey, N., et al. *Toxicology and Industrial Health* 33(4) 373-384 (2017).
7. The Effects of Radiofrequency Electromagnetic Radiation on Sperm Function. Houston, Nixon, et al. *Reproduction* (2016)
8. Male Fertility and its Association with Occupational and Mobile Phone Tower Hazards: An Analytical Study. Al-Quzwini, Al-Tae, et al. *Middle East Fertility Society Journal* (2016).

9. Sperm DNA Damage – The Effect of Stress and Everyday Life Factors. Radwan, M, et al. *International Journal of Impotence Research* 28, 148-154 (2016).
10. Electromagnetic Radiation at 900 MHz Induces Sperm Apoptosis through bcl-2, bax and caspase-3 Signaling Pathways in Rats. Liu, Si, et al. *Journal of Reproductive Health* 12:65 (2015).
11. Habits of Cell Phone usage and Sperm Quality – Does It Warrant Attention? Zilverlight, Wiener-Megnazi, et al. *Reproductive BioMedicine Online* 31(3):421-426 (2015).
12. Extremely Low frequency Magnetic Fields Induce Spermatogenic Germ Cell Apoptosis: Possible Mechanism. Lee, Park, et al. *BioMed Research International* 2014(2014): 567183 (2014).
13. In Vitro Effect of Cell Phone Radiation on Motility, DNA Fragmentation and Clusterin Gene Expression in Human Sperm. Zalata, El-Samanoudy, et al. *International Journal of Fertility and Sterility* 9(1):129-136 (2014).
14. Effect of Electromagnetic Field Exposure on the Reproductive System. Gye and Park. *Journal of Clinical and Experimental Reproductive Medicine* 39(1):1-19 (2012).
15. Effects of the Exposure of Mobile Phones on Male Reproduction: A Review of the Literature. Vignera, Condorelli, et al. *Journal of Andrology* 33(3):350-356 (2012).
16. Use of Laptop Computers Connected to Internet Through Wi-Fi Decreases Human Sperm Motility and Increases Sperm DNA Fragmentation. Avendano, C., et al. *Fertility and Sterility* 97(1):39045 (2012).
17. Exposure to Magnetic fields and the Risk of Poor Sperm Quality. Li, Yan, et al. *Journal of Reproductive Toxicology* 29(1):86-92 (2010).
18. Mobile Phone Radiation Induces Reactive Oxygen Species Production and DNA Damage in Human Spermatozoa In Vitro. Luliis, Newey, et al. *PLoS ONE* 4(7) (2009).
19. Radio Frequency Electromagnetic Radiation (Rf-EMR) from GSM Mobile Phones Induces Oxidative Stress and Reduces Sperm Motility in Rats. Mailankot, Kunnath, et al. *Clinical Science* 64(6):561-5 (2009).
20. Cell Phones: Modern Man's Nemesis? Makker, Varghese, et al. *Reproductive BioMedicine Online* 18(1):148-157 (2008).
21. Indicative SAR Levels Due to an Active Mobile Phone in a Front Trouser Pocket in Proximity to Common Metallic Objects. Whittow, Panagamuwa, et al. *Propagation Conference* 149-152 (2008).
22. Cell Phones and Male Infertility: Dissecting the Relationship. Deepinder, Makker, et al. *Reproductive BioMedicine Online* 15(3):266-270 (2007).

## Conclusion

*The notion that exposure to radio-frequency microwave radiation is not harmful to humans, which has been the underlying principle of all federal legislation and regulations regarding wireless technologies for more than twenty years, has now been proven false.*

*The substantial body of credible science documenting harm from exposure to various levels and frequencies of wireless radiation mandate a precautionary approach to the widespread deployment of wireless technologies to reduce potential harm to the public and the environment. [1]*

*While some studies on wireless radiation exposure found no effects, hundreds of studies did find biological effects occurring at levels at or below current U.S. standards. This has prompted more than 240 scientists with published peer-reviewed research on wireless radiation and health to sign an appeal to the World Health Organization and the United Nations, calling for precautionary health warnings and stronger regulation of wireless radiation. [2]*

*As the wireless industry ramps up its hype for the next generation of wireless communication, hundreds of thousands of new cellular antennas will be deployed on the ground and in the air, resulting in an increase in the complexity of EMR frequencies, pulsations and density which have not been shown safe for humans. Respected researchers have given us a much better foundation from which we can extrapolate that this increased EMR exposure is an undeniable risk to our health and the environment. [3]*

## **The Pampers Petition**

## *Help Get the #1 Dumbest “Smart” Product Off the Market!*

*How would you like it if we put a wireless antenna inside your pants?! Chances are, you wouldn't like it one bit, especially if you knew that the U.S. National Toxicology Program (NTP) recently completed a \$30 million-dollar study that found “clear evidence” of cancer associated with exposure to wireless radiation.*

*Pampers recently launched its line of Lumi “smart” diapers which are equipped with a wireless-enabled sensor that can track when a diaper needs changing. If you think putting a wireless device on or near a baby's reproductive system is wrong, please sign the petition to Pampers now and demand that they take their “smart” diapers off the market.*

### *Let's Reduce Children's Exposure to Wireless Radiation!*

*Over the past several decades, independent researchers have published thousands of peer-reviewed scientific studies documenting serious adverse health impacts from exposure to wireless radiation, ranging from neurological and behavioral problems to cancer. (Some of those studies are available here for your review).*

*Companies selling “smart” tech products claim that their wireless devices meet all Federal Communications Commission (FCC) exposure limits, and while that may be true, the guidelines themselves are almost 25 years out of date and were never designed to protect children. In 2013, the American Academy of Pediatrics (AAP) sent a formal letter to the FCC complaining that its wireless radiation exposure limits do not account for the unique physiological vulnerabilities of children, nor do they reflect current use patterns of wireless devices.*

*Dr. Hugh Taylor, the Chair of Obstetrics, Gynecology, and Reproductive Sciences at the Yale School of Medicine encourages his patients and pregnant women to “do your best to keep your cell phone away from your baby” and mitigate exposure to wireless radiation whenever possible.*

*With that, please sign the petition demanding that Pampers take their “smart” Lumi diapers off the market. The science says that wireless antennas don't belong near our babies' reproductive systems!*

## Abstract

Currently there are four major pharmaceutical companies who manufacture a SARS-CoV-2 now called SARS-CoV-19 vaccine. These manufactures and their vaccine are Pfizer--BioNTech mRNA Vaccine, the Moderna-Lonza mRNA-1273 Vaccine, the Serum Institute Oxford Astrazeneca Vaccine and the Janssen COVID-19 Vaccine, manufactured by Janssen Biotech Inc., a Janssen Pharmaceutical Company of Johnson and Johnson, a recombinant, replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein [1]. The intended purpose of these vaccines are to provide immunity from the so-called infectious novel coronavirus or SARS-CoV-2 virus now called the SARS-CoV-19. These four pharmaceutical companies have not provided complete FDA disclosure on their vaccine box, insert fact sheet or label for many of the major and/or minor ingredients contained within these so-called vaccines. The purpose of this research article is to identify those specific major and minor ingredients contained in the Pfizer Vaccine, the Moderna Vaccine, the Astrazeneca Vaccine and the Janssen Vaccine using various scientific anatomical, physiological and functional testing for each SARS-CoV-2-19 vaccine. As a human right, governed under World Law by the Nuremberg Code of 1947, the vaccine specific ingredient information is critical, required and necessary to know so that any human from any country in the World can make an informed decision whether or not to consent to the SAR-CoV-2-19 inoculation [2]. We have conducted the scientific testing on each vaccine and have identified several ingredients or adjuvants that have not been disclosed which are contained in these four SARS-CoV-2-19 vaccines. Currently, these vaccines are being administered to millions of humans around the World under an Emergency Use Authorization (EUA) issued by each country without full disclosure of all ingredients and in some cases mandated by governments or employers in violation of individual human rights under the Nuremberg Code of 1947 [3].

**Keywords:** SARS; CoV-19; Vaccine; Bioweapon; 5G; Graphene; Graphene Oxide; Graphene Hydroxide; Parasite; Trypanosoma; PEG; Polyethylene Glycol; Nano Dots; rGO; GO; mRNA; Pfizer; Moderna; Astrazeneca; Janssen Pharmaceutical; Electron Microscopy; Fluorescence Microscopy; Brightfield Microscopy; Darkfield Microscopy; pHase Contrast Microscopy; UV Absorbance; Fluorescence Spectroscopy; Transmission Microscopy; Energy Dispersive Spectroscopy; X-ray Diffractometer; Nuclear Magnetic Resonance; Vaccine Ingredients

## Methodology and Techniques

Four "vaccines" were analyzed which are the Pfizer-BioNtech, Moderna-Lonza mRNA-1273 Vaccine, Vaxzevria by Astrazeneca, Janssen by Johnson and Johnson, using different instrumentation and protocols of preparation according to new nano particulate technological approaches. The different instrumentation includes Optical Microscopy, Bright-Field

Microscopy, pHase Contrast Microscopy, Dark-Field Microscopy, UV absorbance and Fluorescence Spectroscopy, Scanning Electron Microscopy, Transmission Electron Microscopy, Energy Dispersive Spectroscopy, X-ray Diffractometer, Nuclear Magnetic Resonance instruments were used to verify the "vaccines" morphologies and contents. For the high-technology measurements and the care of the investigation, all the controls were activated, and reference measurements adopted in order to obtain validated results.
