

# Whoever Is In Charge Of Geoengineering Operations Needs To Be Prosecuted For Crimes Against Humanity And Our Biosphere

I have been following the work of Michael Merrick on Telegram - he goes under the name of LAC microscopy. He has not only replicated many of the experiments of Clifford Carnicom and myself, but he has looked at drugs like Enbrel and found nanotechnology. He also recently looked at rainwater and found these filament

about 20 million nanoparticles per breath.

These self assembly polymer filaments look like what we find in the blood. Our air is poisoned and our biosphere is being systematically destroyed.

**Groundbreaking air pollution study finds almost no safe place on Earth - Only 0.001 percent of the global population is exposed to WHO-safe levels.**

ANA MARIA MIHALCEA, MD, PHD · MAR 8

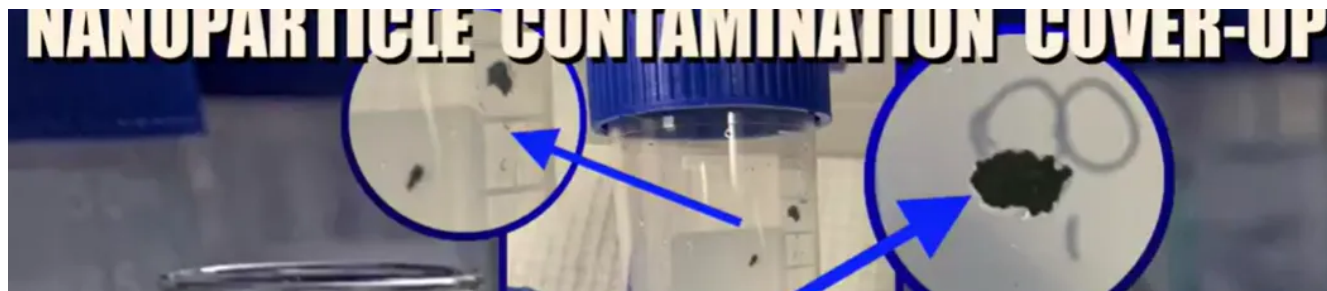

I am reposting this article from [interestingengineering.com](https://interestingengineering.com). While it discusses measuring particulate air pollution, it does not mention the estimated 40 Million Tons of toxic metals and Graphene Oxide that are being sprayed via geoengineering worldwide, to the detriment of the global population. Nevertheless, people can understand that breathing toxic ...

It is well known that geoengineering is a major part of not just weather warfare and climate engineering, but also depopulation by making people sick from inhaling toxic nanoparticles and graphene oxide.

## Nanoparticle Contamination Cover Up - Important Interview with Dane Wigington - 40 Million Tons of Metal Nanoparticles And Graphene Oxide Are Being Sprayed Worldwide - Humans Are Inhaling It

ANA MARIA MIHALCEA, MD, PHD · MAR 5

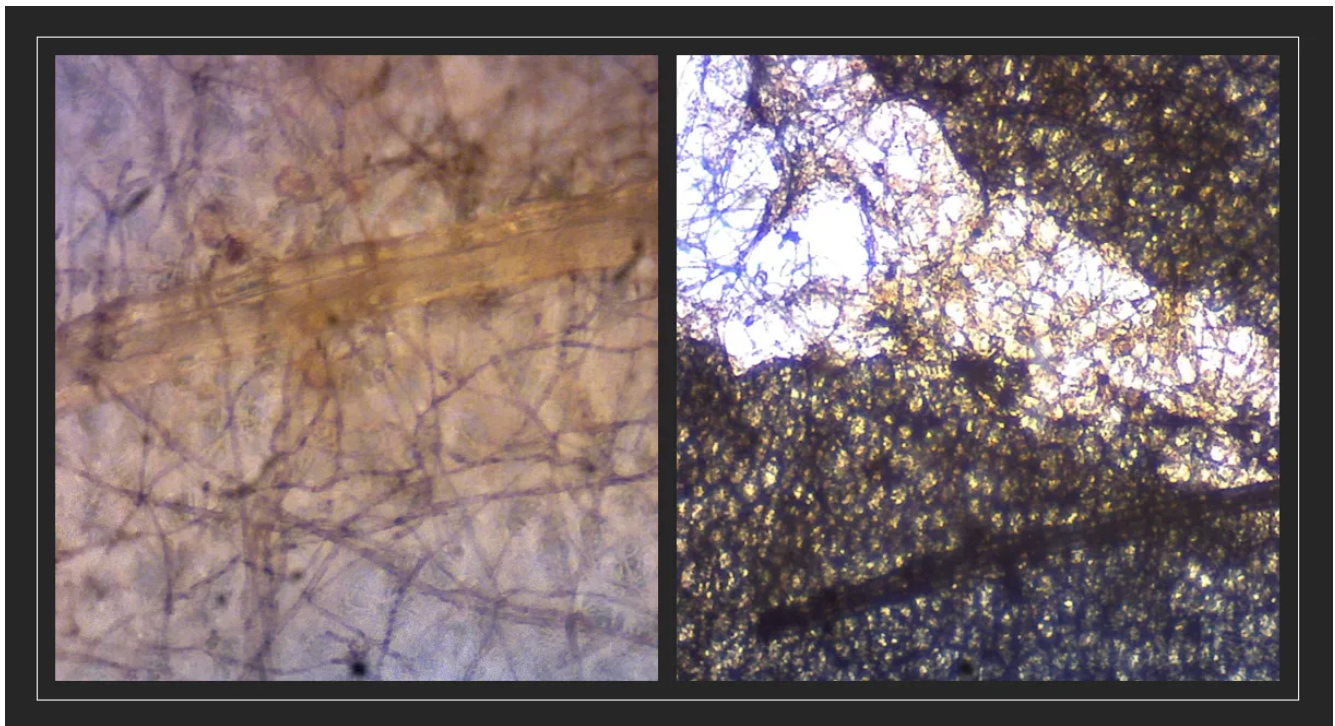

Dane Wigington interviews PhD Whistleblower. Millions of Tons of toxic nano particles are being sprayed on us. I have been warning about this toxic contamination of our entire biosphere and the nano particle metals and Graphene oxide in the C19 vaccine and how this is part of the transhumanist control and depopulation agenda. I have shown urine metals t...

This is in the rainwater, in our food and water supply. You are breathing, eating and drinking this poison. Your tax payer dollars are being used for clandestine operations to weaponize the ionosphere and change all life on earth into synthetic biology. This needs to stop!

These filaments are self assembly polymer nanotechnology, just like what we found in

the C19 bioweapons.

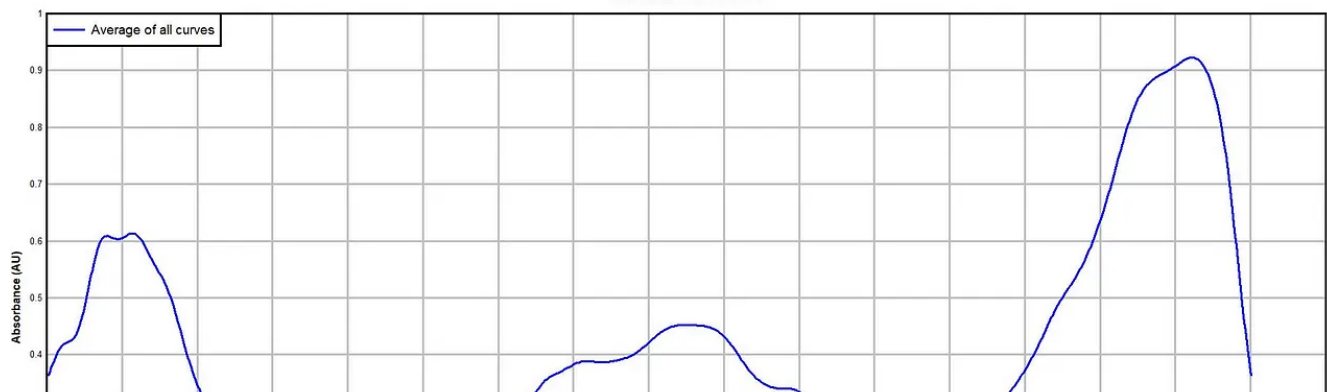

In these articles I show the chemical analysis similarities between the environmental filaments and the nanotechnology found in human blood. Clifford Carnicom had a metals analysis of the filaments done:

Image: Near Infrared Spectrum Analysis of the lower layer of CDB isolate from C19 unvaccinated blood. Executive Summary: In this paper we present the Near Infrared Chemical Analysis Fingerprint of the Cross Domain Bacteria (CDB) lower layer isolate from unvaccinated blood from which the filament structures grow. We have shown in previous studies that th...

This article has an important mass spectroscopy analysis of environmental filaments showing dangerous polymer chemicals toxic to human health and similar chemicals that are also in the C19 shots:

## Chemical Analysis Comparison of Hydrogel Filaments from C19 Shots and Environmental Geoengineering Sources - Project What Happened to Humanities Blood?

ANA MARIA MIHALCEA, MD, PHD · APR 7

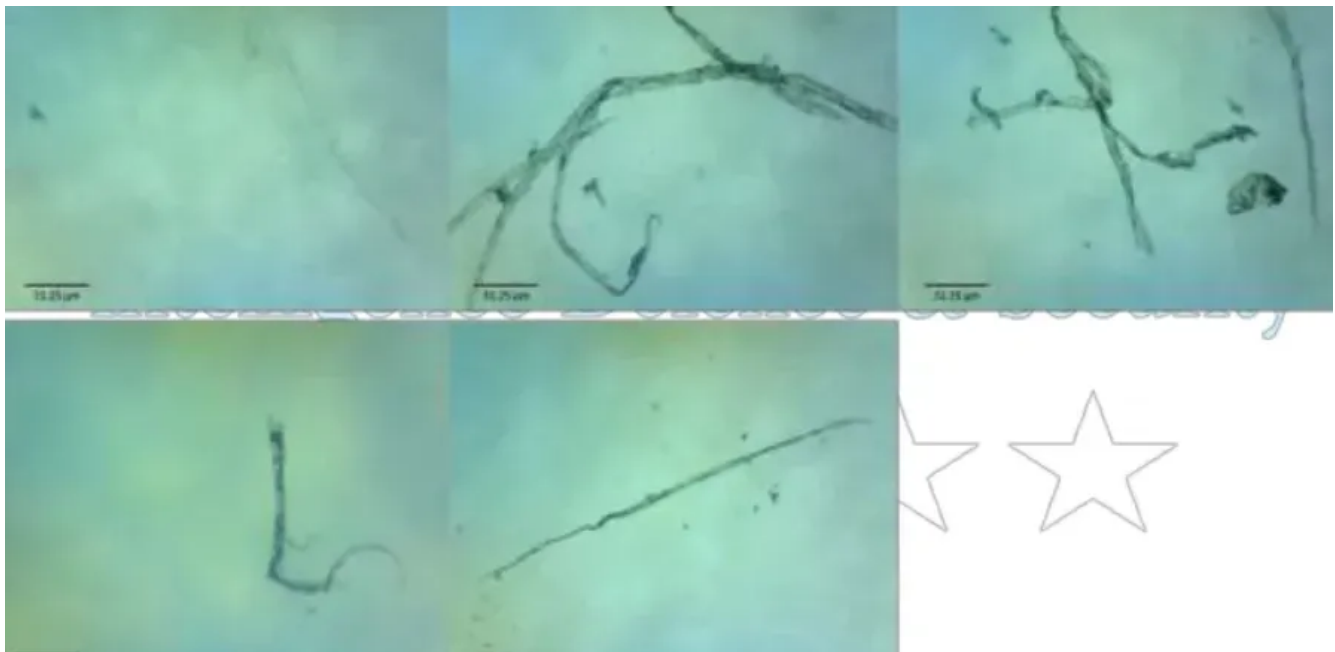

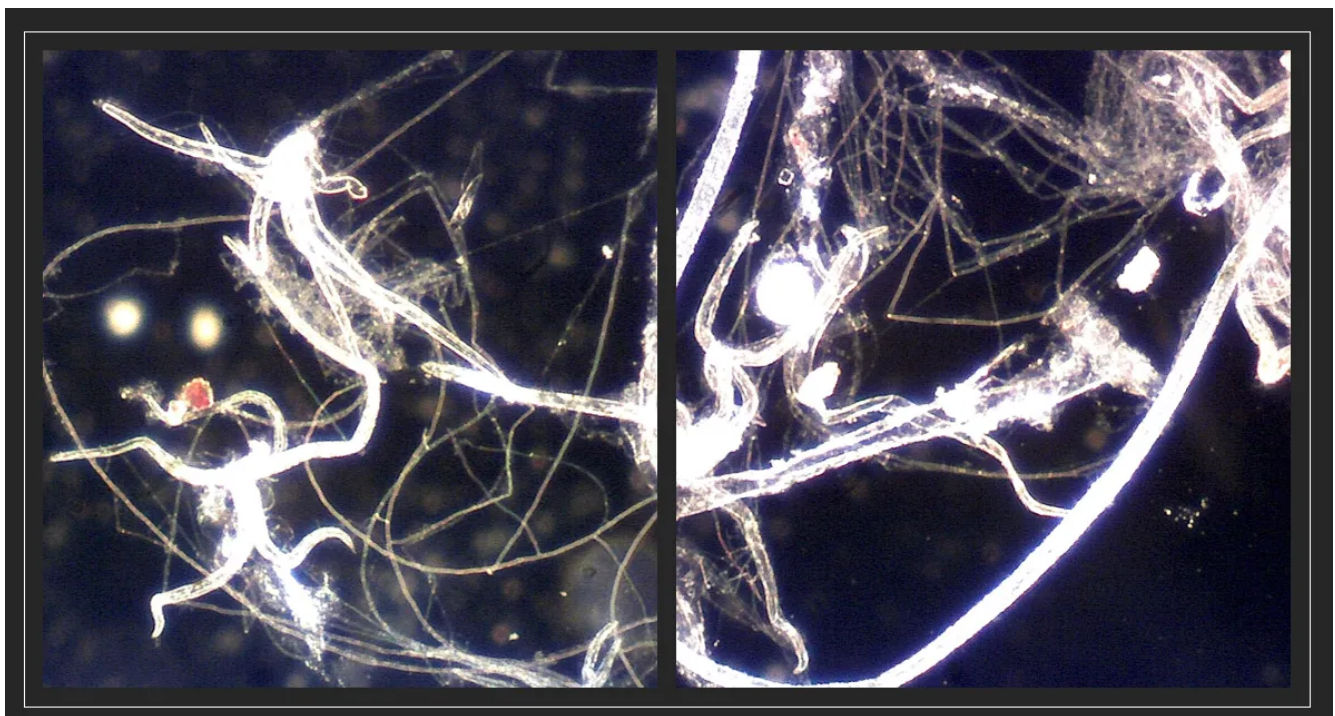

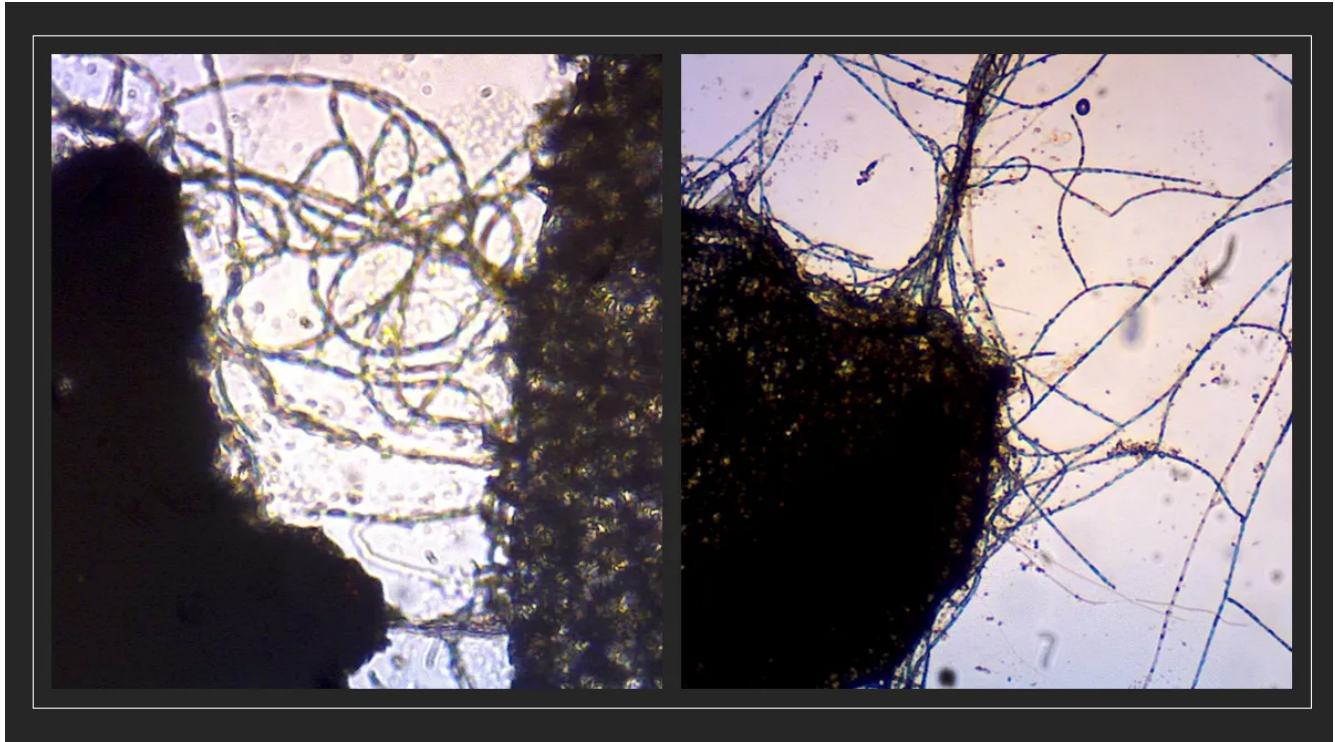

Image: Moderna C19 shot filament growth Project CUNIT-2-112Y6580 Introduction: I have

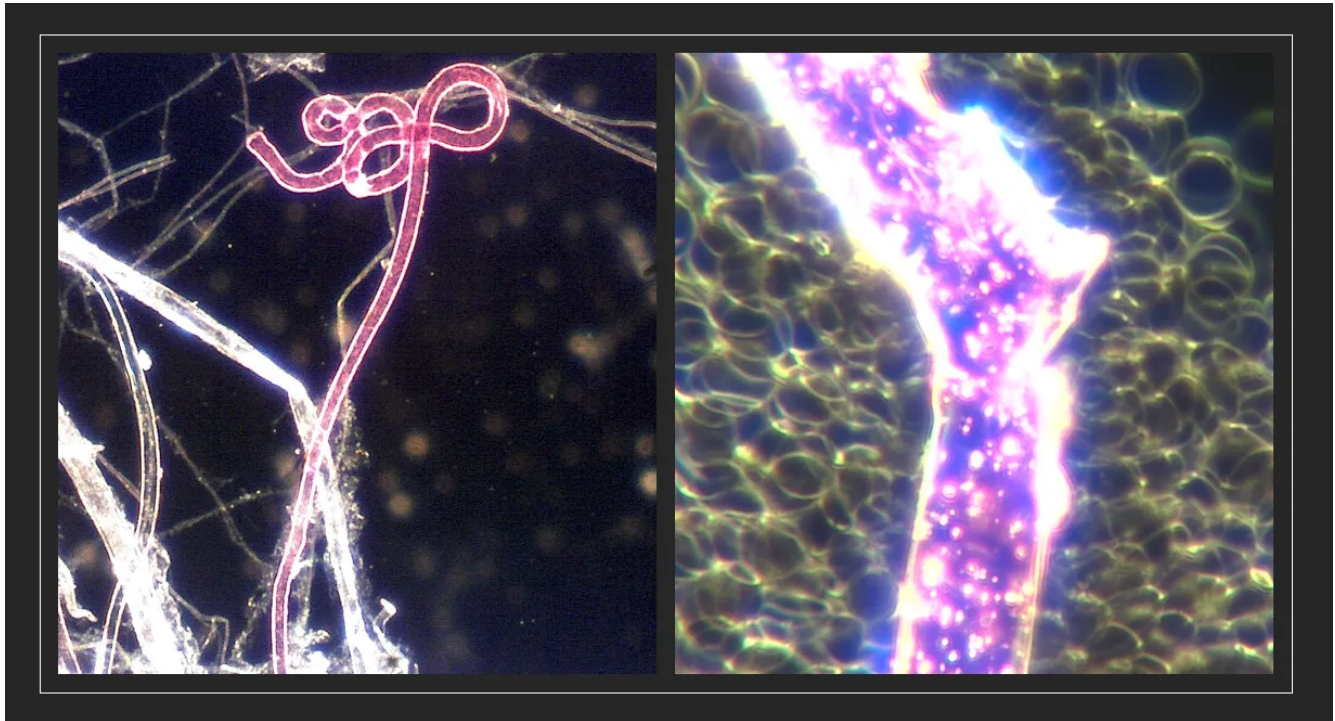

been discussing that the filaments seen in live blood, C19 shot contents and the environmental poisoning via geoengineering can come from different sources - however there are some remarkable similarities present that are worthy of further study. In my view, this assau...

On the left you see the rain water sample, on the right a live blood analysis of an unvaccinated individual. See the resemblance?

The criminals in charge of the illegal geoengineering projects that poison humanity and the earth need to be prosecuted and the programs stopped immediately.

*Thank you so much Michael Merrick for your work. Brilliant!*
