

This article is from the Saturday March 15, 2025 edition of the Canada Health Alliance Weekly Report

## **The Public Health Agency of Canada Admits Covid-19 'Boosters' "Triggered A Major Death Surge."**

In our newsletter a week or two ago we mentioned in our Wins of the Week that the Public Health Agency of Canada (PHAC) had admitted that the boosters were killing Canadians.

Although that news was certainly not a 'win,' as such, it was more so because of the fact that they had at last admitted that the Covid injections were causing more harm than good, and that was a MAJOR reversal in what they have been telling us for the last half-decade! While we are encouraged that the sheer, overwhelming weight of evidence is forcing the PHAC to finally admit that there is a problem, and now that we have read the reports and admissions of PHAC and a slew of other health agencies around the world, we are shocked at just how dangerous and deadly these injections really are.

In a very well researched article by Frank Bergman that was published in the Slay News website, he writes that the Canadian government has admitted that Covid mRNA "booster" shots triggered a major surge in deaths among people who received the "vaccines." The sickening

admission was made in a report from the Public Health Agency of Canada (PHAC).

In a parliamentary response, the PHAC's report reveals that deaths spiked dramatically in individuals who were "boosted" with a third and fourth Covid mRNA "vaccine," especially between the months of June and August 2022.

The PHAC report, which, predictably, received very little mainstream media coverage, confirmed that Canadians who were "boosted" suffered far higher mortality compared to the unvaccinated.

Now, given the recent European Court of Justice ruling that doctors who administered the Covid vaccines are ultimately responsible for any injuries caused by the shots, this PHAC admission opens up questions as to who will ultimately be responsible for all the vaccine injury compensation claims.

While this should be of grave concern to Canadian doctors who willingly followed their health authority and college directives, Canada is not the first country to identify this link between all cause mortality and the Covid vaccines and

boosters. Many other 'First World' countries have been quietly carrying out their own research to try and understand what caused the spike in all cause mortality going back to mid-2021.

In February a group of leading scientists in Germany raised the alarm after discovering evidence buried in the German government's official data that confirms that their excess deaths were caused by the Covid mRNA injection and not by Covid infection as previously claimed.

While in the United Kingdom a recent study that also analyzed official 'all cause mortality' data from the UK government's Office for National Statistics for the period from April 2021 to May 2023 found that the death rate has been soaring among those who received the Covid mRNA injections. This was particularly pronounced in the 18-39, 80-89, and 90+ age groups where *"mortality rates surged dramatically among the 'vaccinated,' far exceeding the unvaccinated."* Over the same period of this

study there was no change in the long term mortality rate for the unvaccinated.

The above studies did not delve into the reasons why those who have received the Covid boosters are dying at a much higher rate than expected. However, Slay News (who have been closely following and reporting on this 'Booster scandal') have previously reported that doctors have recently issued a chilling warning after discovering that these same Covid mRNA booster shots have begun causing a deadly strain of the tuberculosis (TB) virus to "awaken" in people who received these untested vaccines.

According to the report, a group of doctors studying the effects of the new mRNA vaccines have confirmed that the Covid "vaccines" cause dormant tuberculosis (TB) infections to "wake up" in people. It is estimated that approximately 25% of the world's population is latently infected with TB. Most people are unaware of the dormant infection because it's completely symptomless and doesn't cause any

health issues – provided it stays latent. Yet, for the roughly 8 million people who are diagnosed with TB globally each year, more than a million die, so it is a serious health risk.

The frightening discovery made over the last few months confirms that the Covid mRNA boosters specifically can “reawaken” the dormant TB virus and cause severe and potentially fatal symptoms.

Meanwhile, leading scientists from the world-renowned Yale University have confirmed that Covid mRNA injections also cause vaccine-acquired immunodeficiency syndrome (VAIDS). As we have suspected for a long time, this bombshell study conducted at Yale’s School of Medicine has scientifically proven that the mRNA injections alter human biology to create long-term spike protein production that continues to increase over time. Part of this genetic ‘editing’ alters T cell immunophenotypes, which triggers VAIDS – or “vaccine-induced AIDS.”

All of these recently proven health complications linked to the Covid boosters contribute to the supposedly ‘inexplicable’ surge in deaths that we have seen in those ‘over vaccinated’ with the Covid boosters. As awareness of this has spread so it has added urgency to the growing international calls for the distribution and use of all Covid vaccines, including the boosters, to be halted immediately.

Hopefully with Robert F. Kennedy Jr overseeing the decisions of the CDC, the FDA and NIH and his focus on proper scientific research America will be the first nation to put a moratorium on the use of this deadly gene-therapy which has been sold to us under the guise of a safe and effective “treatment.”
